SUMMARY

Innovative **Full-Stack Software Developer** with nearly 2 years of experience designing and deploying secure, scalable web and mobile applications. Proficient in **Django, Laravel, and Firebase**, with growing expertise in **Node.js, Express, and React**. Passionate about solving real-world challenges through code — from e-commerce to healthcare — and delivering impactful digital products in agile, remote environments.

TECHNICAL SKILLS

Languages & Frameworks: Python, PHP, Java, Django, Laravel, Flask, Node.js, Express, React, Firebase

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Version Control & Tools: Git, GitHub

Core Competencies: REST API Development, Cloud Integration, Mobile App Development, Agile Collaboration, Technical Support

EXPERIENCE

Freelance Software Developer & Technical Consultant

Self-Employed | Remote | Jan 2024 – Present

- Developed secure and responsive web and mobile applications for business, research, and health sectors.
- Built and deployed full-stack systems using Django, Laravel, and Firebase.
- Led integration, deployment, and client training for multiple projects:
 - **FoxtrotOscarVictor:** Web design, content management, and digital research automation.
 - **Bosses Build Business Credit:** Optimized platform performance and implemented advanced security controls.
 - **Lukard Technologies:** Served as Technical Manager overseeing digital strategy and product delivery.

Mobile App Developer Intern

Kakebe Technologies | Lira, Uganda | Aug 2023 – Nov 2023

- Developed Android apps in Java and Firebase, integrating APIs and improving system performance.
- Collaborated in agile sprints, managed Git-based version control, and enhanced app UX through iterative testing.

SELECTED PROJECTS

- **IPT Reminder System:** A Django + Firebase-powered system that notifies pregnant women to attend **Intermittent Preventive Treatment (IPT)** every four weeks, including SMS and FCM alerts.
- **KqhahShop.com:** Full-featured **e-commerce platform** for selling body oils and butters, built with Laravel and MySQL.
- **Anemia Detection App:** Android app using **palm image analysis** to estimate anemia levels via TensorFlow Lite and Firebase.
- **Content Management System:** Django-based CMS supporting secure multi-user authentication and analytics.

EDUCATION

Bachelor of Science in Computer Science

Lira University | 2021 – Present
